

ANDREW PETER

Full-Stack Developer | andrewpeter@gmail.com | 416 435 0126 | Toronto, ON

Website: <http://www.andrewpeter.com/> | LinkedIn: <https://ca.linkedin.com/in/andrewpeter>

- SUMMARY**
- Full-stack developer with experience designing, developing, and deploying scalable web applications and automation tools
 - Strong proficiency in Python, C, C#, JavaScript, TypeScript, SQL, and frameworks like Flask, React, and Node.js
 - A deep understanding of cloud technologies (AWS, Azure, Heroku), including serverless architecture, authentication systems, and database management

- EDUCATION & CERTIFICATES**
- **Bachelor of Computing, Honours** | University of Guelph (June 2023)
 - **DeepLearning.AI Chat GPT Prompt Engineering for Developers** (Feb 2024)
 - **AI-900 Microsoft Azure AI Fundamentals** (Nov 2023)
 - **AWS Cloud Practitioner; AWS Knowledge: Cloud Essentials** (Aug 2023)

- EXPERIENCE**
- Software Developer (Co-op)** | BMO – Toronto, ON 01/2022 – 08/2022
- Improved debugging efficiency by implementing enhanced C# middleware logging, reducing dependency on cross-team communication and cutting debugging times by up to 8 hours
 - Created complex SQL queries to extract and analyze real-time market data, ensuring up-to-date risk assessments for the Market Risk Technology Team, allowing for improved data accuracy and more efficient risk calculations
 - Assisted in the development and troubleshooting of distributed computing applications used for risk calculations, leveraging large-scale data processing
- IT Project Control Coordinator (Co-op)** | CIBC – Toronto, ON 05/2021 – 08/2021
- Coordinated project kick-off meetings, provided regular follow-ups on deliverables, and delivered status updates to stakeholders, ensuring developers met requirements, addressing roadblocks, and keeping project managers informed on progress and timelines
 - Assisted in budget monitoring and forecasting for large-scale financial technology initiatives, improving financial oversight and providing detailed analysis to project manager

- PROJECTS**
- AWS Hackathon** | Serverless Word-Based Game – [Iteratively](#)
- Designed and developed a word-based game using Vite, React, and AWS Amplify, implementing a serverless architecture with Amazon API Gateway for backend communication
 - Leveraged AWS Bedrock to generate AI starting words to initiate the game
 - Integrated Amazon Cognito for secure user authentication, Amazon S3 for storing game assets, and DynamoDB to track high-score leaderboards in real-time

Web Based App Development – jobnavigAltor.com

- Developed a full-stack application using Flask (Python), React, and PostgreSQL, hosted on Heroku to automate resume customization, job tracking, and interview preparation
- Integrated OpenAI APIs to generate tailored cover letters, thank-you emails, and application insights

3D Physics-Based Platformer Game – [Ra1nb0w](#)

- Developed a Unity-based platformer in C#, incorporating procedural level design, interactive mechanics, and audio-synced obstacles, while implementing game physics, AI pathfinding, and real-time player tracking to enhance engagement.

- SOFTWARE**
- **Fully Proficient in:** Programming Languages (Python, JavaScript, TypeScript, C, C#, SQL, HTML, CSS)
 - **Fully Proficient in:** Frameworks & Tools (Flask, React, Node.js, AWS Amplify, Docker, Unity, Jira, Bitbucket)
 - **Fully Proficient in:** Databases (PostgreSQL, SQL Server, DynamoDB)
 - **Fully Proficient in:** Cloud & DevOps: AWS (Cognito, S3, API Gateway, Bedrock), Heroku CI/CD, REST APIs, Distributed Systems
